The legislature previously overhauled the state's "birthday tax" and created a new system for a title transfer fee, the proceeds of which would be distributed between state and local government authorities. Last week, the House passed the legislative fix aimed at the double taxation of leased cars without a fiscal note, and the legislation quickly ran into problems in the Senate as the Senate discovered the fiscal note would cost the taxpayers \$140 million. Several legislators protested as the Senate shifted operations this week in an effort to fix the legal challenges by the March 1 deadline. The Senate proposed to fix the penalty by adjusting the state rental car tax slightly upward. After several days of political maneuvering and conference committee meetings, the legislature arrived at a compromise.
