

Patient Advocacy Summit

September 21, 2021 | 11am - 1pm | Virtual Summit

Support Georgia Bio's second annual Patient Advocacy Summit! The COVID-19 pandemic has amplified the need to explore ways in which biopharmas, patient advocacy organizations, and legislators can better partner to advance new treatments and cures. The event will bring together the patient advocacy community to showcase best practices and cutting-edge examples of how life sciences companies can more fully incorporate the patient voice into the work they do—not just approaching regulatory applications or at commercialization, but throughout the drug development cycle. Networking will be offered through the virtual platform from 10am until 4pm.

For more information about sponsorship opportunities, please contact Kristina Forbes at kforbes@gabio.org or **404.920.2043**.
